RTO Software Accelerates Worldwide Growth

Continues successful climb as the company grows revenue base by over 300% and records first year of profitability

ATLANTA, GA – January 31, 2005 – RTO Software, provider of application-focused performance monitoring and management tools for any business-critical application in any Windows server environment, announced today that it had achieved record results in revenues and profits in 2004. The company also disclosed that it grew its customer base by 67%, which now includes many of the world's largest enterprises.

“We have seen tremendous interest in our technology over the past twelve months, and believe that we are well-positioned in 2005 to experience similar levels of growth from our existing and soon to-be-announced product sets,” said Kevin Goodman, President and CEO of RTO Software. “Our company is more focused than ever on increasing the performance and capacity of our customers’ Windows-based environments, and we believe that our 2004 results reflect our customer commitment and focus. In 2005, we look forward to providing solutions and support that more than exceed our customers’ expectations. ”

RTO announced that it grew its customer base by 67%, which now includes a number of Fortune 500 enterprises such as AIG, Equity Office, General Electric, Home Depot, Kroger, Lehman Brothers, Merck & Co., Merrill Lynch, QUALCOMM, Schering-Plough, Sprint and State Street. It also announced that the company grew its revenues by over 300% in 2004, while reaching profitability for the first time in corporate history.

Milestones

The company also completed a number of other milestones that position it for future growth:

- The promotion of Kevin Goodman to President and CEO
- The hiring of Tom Lenahan as its new VP of Marketing
- The addition of David McDonald as its VP of Product Management
- A license of its TScale technology to Citrix Systems, the leader in remote access software
- The beta release of a new application performance management product with scheduled general availability in Q2 of 2005
