RTO Software Announces ARMTech™ Upgrade Program

New Program Provides an Upgrade Path for Aurema Customers

ATLANTA (February 22, 2007) – RTO Software, a leading provider of application availability and management solutions for business-critical applications, announced today an upgrade program for existing ARMTech customers.

"This program allows ARMTech customers to upgrade to the market leading RTO TScale® solution and enables them to leverage RTO's patented CPU and memory optimization technology," said Kevin Goodman, President and CEO of RTO Software.

With this program, RTO Software invites current ARMTech customers to accept a special one-time offering available until March 31, to upgrade to RTO TScale. ARMTech customers can replace their technology and upgrade to industry-leading TScale 4.0 for just the cost of TScale maintenance and a small administrative fee.

For details on this special one-time only *ARMTech Upgrade* program, please contact armtech@rtosoft.com or your authorized RTO Software reseller.

RTO Software continues to be the leading provider of CPU and memory optimization technology for Citrix environments with key patents in these technology areas.

About RTO Software
